*Student rates available.*

The studio @ Picturebox has undergone some major upgrades! We've extended the permanent cyc wall floor, upgraded the power supply, added a green room and now offer wireless internet access.

With 1,400 square feet of shooting space, the studio @ Picturebox is a perfect location for small and midsize greenscreen shoots. The 20'x11'x20' cyc wall can be painted to your specification in chroma-key green, black, white or any color you require. Pre-built flats are available to allow you to quickly create the look of any type of room or set you might need.

The new green room provides additional space needed for hair and makeup, craft services, or production management. Amenities include a refrigerator, microwave, work desk and wireless network access.

In addition, Picturebox has a lighting and grip package suitable for most basic studio shooting needs. We have tungsten lights ranging from 300 to 2000 watts, c-stands, light stands, sandbags, flags, bounce boards and more.

The studio @ Picturebox is an economical shooting solution that doesn't require you to compromise on the quality you expect for your production.
